

LIFE OF A PERMIT WEBINAR INSTRUCTIONS

The Reedy Creek Improvement District (the District), Building and Safety Department (B&S) conducts quarterly webinars to review the life of a permit from submittal to a final certificate issuance. This presentation is open to all parties involved in construction within the District including architects, engineers, contractors and owners. In this 2 hour and 30 minute interactive presentation, the B&S presenters will discuss District-wide addressing and the permitting process, which includes: prerequisites for permitting, permit application submission, digital signatures, design drawings and the digital plan room, response to plan review comments and narrative requirements, plan review modifications, permit issuance to contractors, inspections, plan reviews critical to inspection continuation, site specific and integrated safety systems testing, permit close out, Temporary Certificate and Certificate of Occupancy, Certificate of Construction Completion and the life cycle of a permit.

Following is a list of the 2021 Life of a Permit events. Dates and times are subject to change. RSVP is required for admission to each presentation. There is no limit to the number of attendees who may participate from a single organization. If you have participated in a previous occurrence of this presentation, you may also take the participant survey accessible at the link below.
